Access tokens

OpenID Connect (SSO)

Use OpenID Connect when you want people on Domo to authenticate with an external OpenID Connect Identity Provider. Follow the steps below to configure OpenID Connect.

CANCEL

SAVE CONFIG

☐ Enable OIDC

To fill out this form, you'll need to open your IdP and find the information in its SSO setup. Your IdP may also have a metadata file with all this data that you can upload here. [Manual entry](#)

Information from your IdP
