```
[jeffburtenshaw@Jeffs-MacBook-Pro ~ % mkdir domoappprojects
[jeffburtenshaw@Jeffs-MacBook-Pro ~ % cd domoappprojects
[jeffburtenshaw@Jeffs-MacBook-Pro domoappprojects % domo login
[? Domo instance e.g. company.domo.com wtvassociates.domo.com
(node:12760) Warning: Setting the NODE_TLS_REJECT_UNAUTHORIZED environment varia
ble to '0' makes TLS connections and HTTPS requests insecure by disabling certif
icate verification.
(Use `node --trace-warnings ...` to show where the warning was created)
```

```
✓ Login to wtvassociates.domo.com successful.
Welcome, Jeff Burtenshaw.
```

```
[jeffburtenshaw@Jeffs-MacBook-Pro domoappprojects % domo init
[? design name MyFirstApp
? select a starter hello world
[? would you like to connect to any datasets? No
✓ New design initialized in the MyFirstApp directory
Next steps:
1. cd into the MyFirstApp directory
2. Edit the files that were just generated.
3. Run domo login if you haven't already.
4. Run domo publish to finish initializiation and whenever you make changes.
5. Run domo dev to see what your app will look like and locally develop
6. Add a Custom App card from the design published to any page in Domo.
[jeffburtenshaw@Jeffs-MacBook-Pro domoappprojects % cd MyFirstApp
[jeffburtenshaw@Jeffs-MacBook-Pro MyFirstApp % domo publish
(node:12842) Warning: Setting the NODE_TLS_REJECT_UNAUTHORIZED environment varia
ble to '0' makes TLS connections and HTTPS requests insecure by disabling certif
icate verification.
(Use `node --trace-warnings ...` to show where the warning was created)
